The total of 10 parties and 3 coalitions will participate in the European Parliament elections. The voting-paper will list 17 candidates from each party, coalition or initiative committee. The ballot-paper will be protected against counterfeiting. For instance, the logo with the stars from the flag of the European Union will be protected from copying with a copier.

According to the CECEPE spokesman, the voting-papers have sufficient protection. The envelope for the voting-paper has standard measurements and will be filled enough so that it will be impossible to guess the voter's choice.

The deadline for registration was 7 p.m. last night. Applications were submitted by 17 parties, coalitions and initiative committees. CECEPE did not register only one coalition - "Libertas" - free citizens - because they did not submit a deposit.

The deadline for registration of the initiative committees for independent candidates is 15th of May. So far two independent committees have applied for registration.
