8. The evaluation of proposals will be based on the principles of transparency and equality of treatment. It will be carried out by the Commission with the assistance of independent experts. Each submission will be assessed on the basis of the evaluation criteria, which are divided in three categories: eligibility criteria, award criteria and selection criteria. Only proposals meeting the requirements of the eligibility criteria shall be evaluated further. The evaluation criteria are presented below:

Eligibility criteria

On receipt, all proposals will be subject to the following eligibility check, to ensure that they conform to the requirements of the call, and to the submission procedure:

- Timely arrival. Receipt of proposal by the Commission on or before the deadline date and time established in the call (see point 3 above).
- Proposal completeness. Proposals which are substantially incomplete - that is to say that the forms do not include sufficient information to identify the partners, their legal status and their ability to carry out the work and to evaluate the scope of the proposed project - will be excluded.

Award criteria

In order to evaluate the relative merits of the proposals received, each project type (targeted projects, best practice networks and thematic networks) will be subject to a specific set of award criteria with specific weightings. A detailed description of the award criteria is presented in the Work Programme.

Selection criteria

Selection criteria serve to ensure that proposers possess sufficient resources to co-finance the project as well as the professional competencies and qualifications required to complete the work successfully.

A detailed description of the selection criteria is presented in the Work Programme.

In submitting a proposal, proposers accept the procedures and conditions as described in this call and in the documents to which it refers.

All proposals received by the European Commission will be treated in strict confidence.
